adapt
centric services

“With **adapt** Centric Services we effectively have an Internet service provider in our building, providing just the service we need at this time with excellent support too.”

Marco Correia

Director of Information Technology Europe, **Orient Express Hotels**

Our connectivity, your simplicity

At **adapt** Centric Services we believe you should have fibre optic data connectivity turned on when you want it, be able to upgrade it as required and also benefit from additional managed services when you need them.

adapt Centric Services has partnered with the landlord of your building to pre-install our infrastructure. That means you can use high quality connectivity and access added value managed services in only a few days.

Centric Telecom has been part of the **adapt** Group since 2007 and is now known as **adapt** Centric Services. **adapt** is a managed IT service provider committed to helping our customers remove cost and avoid unnecessary complexity.

Enterprise level connectivity

In today's business environment Tier 1 internet connectivity with unlimited bandwidth is a prerequisite.

What you need is trouble free implementation, a single supplier who will be (and will remain) totally accountable, excellent support and guaranteed access to more sophisticated services when the need arises. This is where the **adapt** Centric Service comes in. We provide you with enterprise level data connectivity and 24x7x365 support, thereby generating value for your business and making savings in your IT budget. Additionally, because we have customers in your building you can be confident we're extremely attentive to the quality of service we deliver and any service issues which arise in your location.

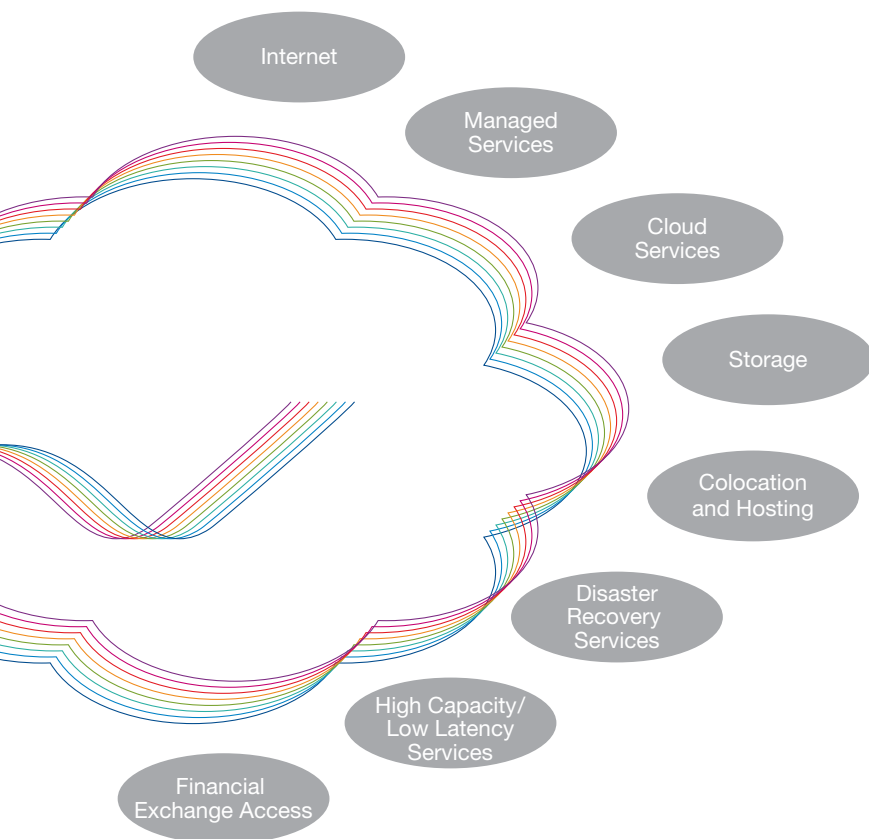

We provide bandwidth to your particular requirements with no upper or lower limits – you choose the bandwidth required for your business at any given period. That doesn't mean however that you're locked into your initial level of allocation, as you can increase your bandwidth to whatever you need. Our pre-installed infrastructure in your building equals simple provisioning with no hassle and no red tape.

By the way, you'll be pleased to note that **adapt** Centric Services' flexibility isn't just confined to our technical services; we can also offer you a variable contract length and bespoke pricing packages. Our objective is always to remove unnecessary complexity so that you can have rapid access to the connectivity and the managed IT services you need to get on with your business.

Connectivity

- Internet access and IP transit via the highest quality Tier 1 transit providers
- Fibre optic low latency, fully symmetrical connectivity
- Uncontended access
- Flexible bandwidth from 1MB to unlimited
- Add more bandwidth with one easy phone call
- Quick and flexible installation in just 10-15 days*
- RJ45 Ethernet cable plugs directly into your LAN
- 24x7x365 helpdesk and engineering support
- Dedicated account manager

The in-building connectivity specialists

Centric, now **adapt** Centric Services, has been providing specialist in-building data connectivity for over 10 years. Our approach is simple – we partner with landlords of prestige offices to pre-install fibre connectivity that can be easily and cost effectively provided to tenants.

Does that make it straightforward for you? Most certainly it does.

Does that mean it's hassle free and extremely quick for you to turn on our services? That's what our customers tell us.

And is it really cost effective? Yes, because we don't have to load your contract with the cost of routing a connection into your building. Moreover, as a partner with your landlord, there will be no problem with authorisation or legal wrangling over wayleaves.

Consider too that since we're servicing other tenants in your building you can be sure we're able to provide you with outstanding support.

“We were extremely pleased about how quickly the Internet service was connected. We're also finding **adapt** Centric Services' flexibility with regard to bandwidth usage invaluable during workload peaks.”

Brendan Hannigan
CEO, MPP Locums/Nursing Personnel

“When selecting a communications provider, we were pleased to learn that a resilient high-speed Internet service was already installed. Our connection was delivered within days of placing the order and the service over the past 10 years has been excellent.”

Gary Eary
IT Director, 2020 Design Consultants

Managed IT services

The same connection we provision into your office can also be used as a gateway to a range of vital IT services.

Because we are part of the **adapt** Group, you can access a comprehensive Disaster Recovery service portfolio, including Data Back-up to a completely secure environment where you can utilise whatever amount of storage you need – and avoid paying for what you don't need.

Additionally we offer a Colocation and Hosting service (local patching is all that's required to utilise one rack or multiple suites in **adapt's** data centres), Managed Services (almost everything from a managed firewall to a whole virtual IT environment), Cloud Services (hosted desktop or automatic software updates, for example) and Financial Exchange Access (high capacity bandwidth to key financial exchanges, trading houses and over 120 Tier 1 data centres across Europe).

Services

You can access any of these services via the existing fibre connection:
Disaster Recovery – multiple options for data back-up in the most secure data centre environments both in central London and outside.

Colocation

From a rack to a whole custom built suite. Whether your infrastructure is owned or leased, and whether you need a fully managed service or just space for racks, we integrate the necessary infrastructure and services to meet your business needs.

Managed Services

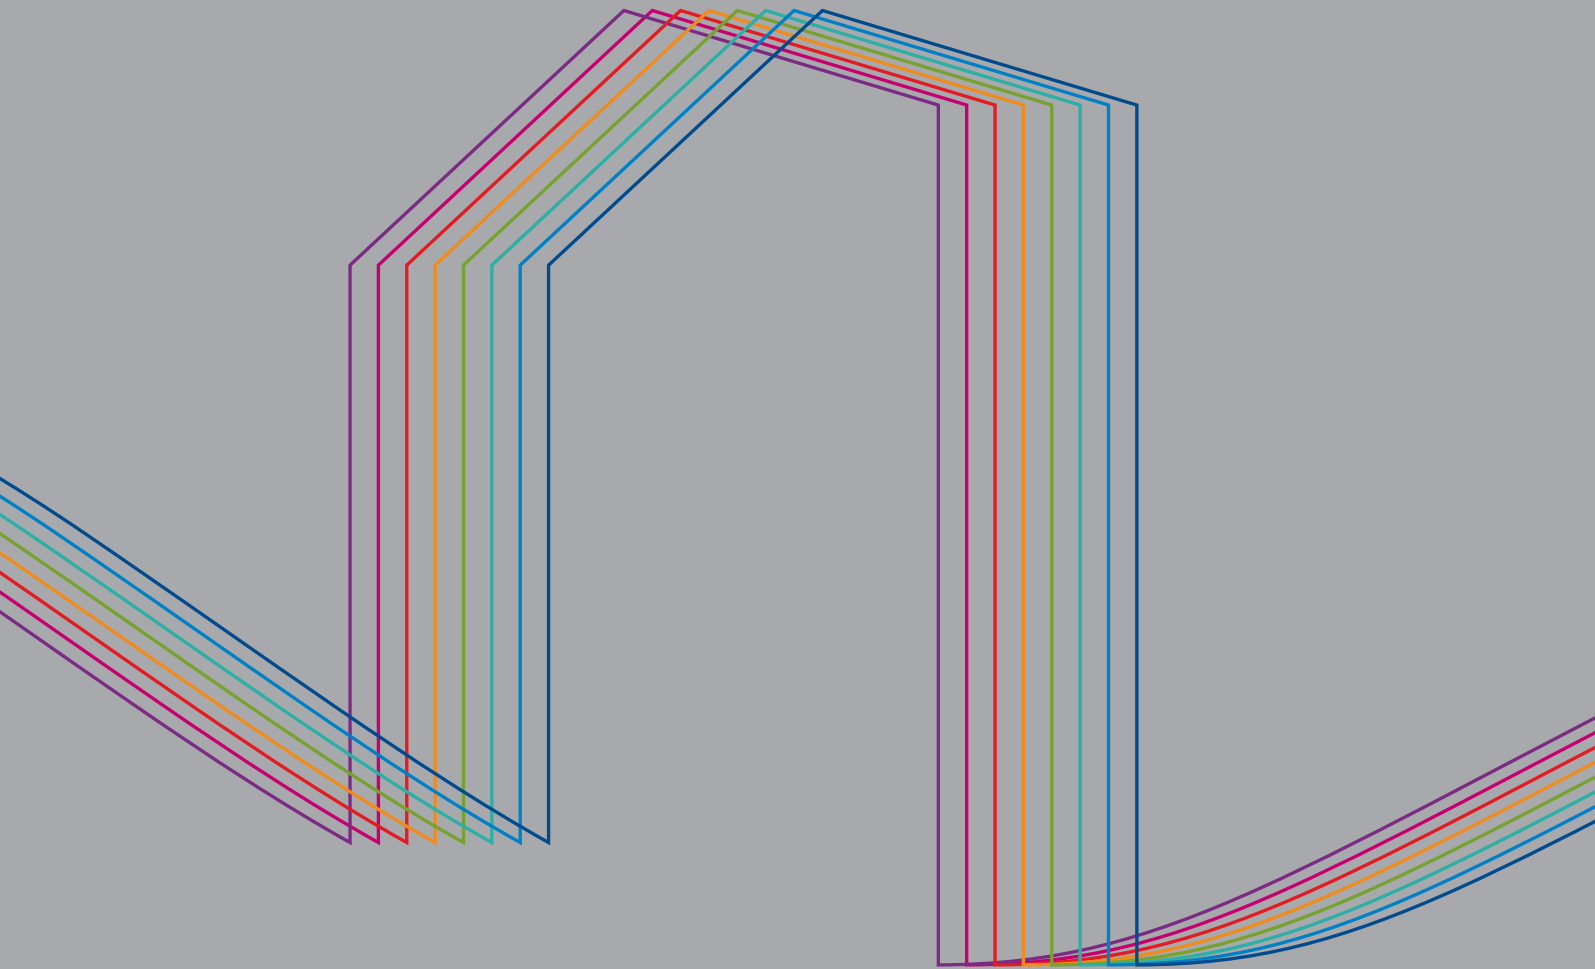

In our virtual data centres we can offer a very wide range of services – from a simple managed firewall through to an entire virtual IT environment.

Cloud Services

Access to IT services, such as hosted desktop and hosted exchange, without any infrastructure investment required.

Financial Exchange Access

High performance Ethernet connectivity with guaranteed low latency and high availability – ideal for mission critical financial trading. Customers benefit from pan-European connectivity to key exchanges, trading houses and over 120 data centres.

In-building fibre connectivity at your fingertips

adapt Centric Services is a leading supplier of in-building connectivity and managed IT services.

We do this by partnering with landlords of prestige offices to pre-install fibre connectivity that can be easily and cost effectively provided to tenants.
