Energy Savings Trust

We provide online backup services with absolute security for all businesses regardless of size and we'll deliver the right solution for you. Our online backup service, powered by Attix5, is ideal if your business is small but you require a more efficient, reliable and secure way to backup and recover critical data. If however you need sophisticated archive management you may prefer our enterprise online backup service, powered by the fully developed Asgira Televaulting solution.

With **adapt** you can relax in the knowledge that all our services are delivered from our secure data centres which are housed within IBM business continuity buildings. You can also connect with confidence to your data because our backup services use our high speed, ultra reliable network infrastructure that has direct connections to multiple Tier 1 internet providers. And with **adapt** your peace of mind is doubled since all your data is stored on fault tolerant servers mirrored in two of our data centres. Our totally reliable online backup solutions are simply twice as nice.

What's on offer?

Automatic

Define a data backup policy, set a schedule and it runs in the background.

Secure

Utilises 128 bit, 256 bit or 448 bit encryption.

Efficient

After the first backup, which can be performed over the Internet or by a portable file server, only the daily changes are backed up at a binary level.

Speed of recovery

As the data is stored on disk, rather than tape, data can be restored immediately.

Centralised control

Backup and restore management and monitoring for all central and distributed servers.

Self service recovery

Laptop users can recover their own lost files without calling the central helpdesk.

Easy to use

Simple to use Graphical User Interface (GUI).

Long term archiving option

Month end archives can be run onto tape for long term storage.

Business continuity

Two encrypted copies of your backup data are stored off site in two separate data centre locations.
